Education

High School Diploma in Electronics
I.I.S Giovanni Giorgi

Java Full-Stack Developer Academy
Krisopea
2023

About Me

I have always been passionate about computer science, especially programming. I started as a child creating web pages using HTML and CSS, switching to different technologies over the years. In January 2023 I embarked on a journey with Krisopea, in particular i joined an academy aimed at forming Full-Stack figures using mainly Java and the various technologies that revolve around it. Web development with Java and its frameworks has therefore become my main interest.

Work Experience

FULL-STACK DEVELOPER @NEXI   04/2023 - 06/2023
KRISOPEA

During my first working experience I participated in the development of a web application for the management of transactions flows between banks.

FULL-STACK DEVELOPER @PAGOPA S.P.A   07/2023 - PRESENT
KRISOPEA

In this new experience, I'm mainly involved in the backend side developing APIs, mainly using Azure Functions and Spring Boot.
